No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                 Sequence 31, Application US/09224024

Patent No. 605653

GENERAL INFORMATION:
APPLICANT: Leslie Hickle
APPLICANT: Jewel Payne
TITLE OF INVENTION: Materials and Methods for the Control
TITLE OF INVENTION: Calliphoridae Pests
NUMBER OF SEQUENCES: 31
CORRESPONDENCE ADDRESS:
ADDRESSEE: David R. Saliwanchik
STREET: 2421 N.W. 41st Street, Suite A-1
                                                                                                                                                                                                                                                                                                                                                                                                                                                        STATE: FL
